

# Mobile Ordering

**Provide the ultimate convenience for your students with real-time mobile ordering from any location.**

## Simple Ordering Process

Allow a student to choose a restaurant, personalize their orders, select a payment method, and submit an order—all from their mobile devices.

Students will be notified every step of the way and receive an accurate estimate of when their order will be ready—using past orders, time of day, queue length, and individual item prep times.

## Seamless Integration

Integrate with your Transact QuadPoint On-Premise or Cloud POS system, and allow students to pay with their stored value accounts, credit cards, and meal plans. Leverage current investments by using existing kitchen displays and/or receipt printers with our robust hardware and software partner ecosystem.

## Increase Engagement

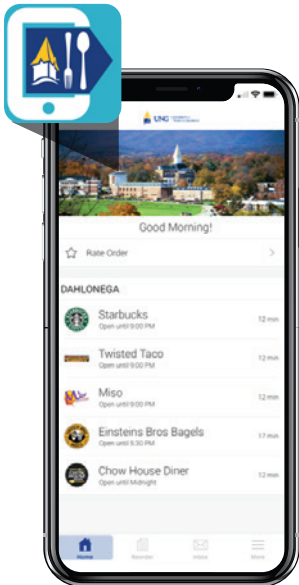

Use the intuitive dashboard for real-time control of menus, hours, rewards, push messaging, announcements, and more—allowing you to turn these insights into powerful actions. Set up customized reports, and access unique user data and trends. Encourage feedback with a mobile rating prompt or in-app call-to-action.

## Influence Behavior

Influence student behavior with incentives and rewards. This optional feature allows students to earn points for accessing services across campus—from dining, campus store, and retail purchases, event tickets, athletic centers, parking fees, and much more. Encourage ordering during off-peak hours or reward students for healthier eating choices.

## Flexibility

Customize your app to fit the unique needs of your campus. Our module-based platform is extremely flexible and integrates into your operational flow, allowing you to position printers and pickup areas to ensure an exceptional student experience. You can also customize your app to support your campus brand!

*“Students love Mobile Ordering! It’s new technology that increases the speed of service by placing their order next in queue...they just eat it up and keep the campus in the right direction in terms of innovation.”*

Jessica Buffington  
Card Service Manager
